- 10 oz. Aerosol Accelerator @ \$13.00
- 16 oz. Refill w/ sprayer @ \$13.00

<https://www.hardwoodstore.com>

A web site with some great information. Different wood types and how well they work for turning, glueing and how toxic to skin and lungs. A good read. Put a bookmark on the page.

Remember pictures with Descriptions to [rumtiger@gmail.com](mailto:rumtiger@gmail.com) Easy to remember.. Rum u drink and it turns you into a tiger??? Well it use to but now that we are seniors (most of us) its good for a nap.

Dave's demo on segmented cutting and gluing was a hit Saturday. Lots of questions and some furrowed brows. Myself got a little lost to be honest but Dave had it all figured out and had turned several nice looking pieces.

Clamping 3 angles together

From glue up to the lathe. Sure saves a bunch of wood and you can make some unusual designs.

8 sided convex shape vase. Note dark inserters between the pcs. Also a walnut canister

# Herb Creations

Plain oak stress bowl

Bleached Live oak

Cherry live edge

Cherry with live edge end grain

Paduak

Eddie Wildsmith

Coffee cart I built for daughter. Wood is red oak.

1st pic is the color coat epoxy. Once dry, sand it all down to get all the excess color off, leaving color in the cracks only. Then applied 3 coats of clear, as shown in the next pics. These will be drilled and used for bottle stopper displays.

Barb Hahn  
Show and tell Jan 12 meet

Barb explains that after turning a pc you take a material similar to play dough, roll it out then apply to your pc.. Imprint designs with color into clay and bake in oven at 200deg?

So dats all folks. Remember pictures to [rumtiger@gmail.com](mailto:rumtiger@gmail.com) by the 1st of month. And we are looking for demos.
