Karen's Korner

Happy St. Patrick's Day

Hopefully, winter will end soon. I thought that last month, but it seems to linger.

Thanks to Roy Yarger and Drew Orr, I had a lot of oak and sweet gum cut into manageable pieces. Several members have come and picked up what they want, but there is still plenty. Please let me know if you want any.

This month's meetings will be different for the club. One of our new members, Barb Hahn, will be hosting the woodturner's meeting on the 8th of March. See directions below.

And, the wood workers' meeting on the 18th will be held at a workshop located at the airport in Brunswick. The demo will be given by Mike Hasty who makes acoustical guitars. We are to meet at Roy's house promptly at 7 p.m. and take just a few cars to the airport as Mr. Hasty's parking is limited.

Karen Grogan, Secretary, GIWW

Woodturner's Meeting

Monthly Meeting – **Saturday, March 8, 2014** – 9 a.m. - 53 Sheffield Court, Kingsland. Take I-95 south to Exit 7, Turn right onto Harriet's Bluff Road. Turn left onto Hwy 17/GA 25. Approx 1.4 mi, turn right onto Colerain. Cross railroad tracks and turn left just beyond the tracks onto Sheffield Cemetery Road. Approx .3 mi, bear left on Sheffield Court. 53 Sheffield Court will be just ahead on the left. Bring a chair.

President's Message

Fellow Woodworkers and Woodturners,

The club officers have been elected and dues paid. The club now has 22 paid members. Many thanks to all for contributing to make this club such a success.

This month's meetings will be both educational and different from the norm. We will get a chance to see how a guitar is constructed. This will be very interesting to a guy that worked for Gibson in Kalamazoo while in college.

The woodturners will venture out to another shop for the first time. Something we should do more of in the future.

Hope to see you all at the meetings

Roy Yarger, President

Woodworker's Meeting

Monthly Meeting – Tuesday, **March 18, 2014** – 7:00 p.m. SHARP, meet at Roy's studio to carpool to the airport for a demo by Mike Hasty on building an acoustical guitar. Bring a chair.

MEMBERS' WORK

JEFF'S LACKEY'S PROJECT

The side-doors for the chain compartments are held in place by magnets. That's an interesting story since the depth dimension was based on some published information in the Rockler catalog. When I got the initial "touch to open magnetic latches" I discovered they were too long to fit. The catalog had a typo. I called the customer service people and they were surprised. So at no cost, they supplied me with magnetic catches. Thus I had to add knobs to the side-doors. I made the knobs for the doors and the drawers with my router. Bobbi thought they were really cute. The hinges for the top are brass "stop hinges" that hold open at 95 degrees. They were expensive, around \$36 for the two hinges from Rockler.

Red duck cloth will be added as a liner to the bottom of the top compartment and drawers once the painting is completed. And I have a mirror and frame to add to the top as well. It goes in the depressed area on the top which I routed out. The 4" x 6" mirror was only \$2 at *Pain In The Glass* on SSI. The frame molding I made on my router. It will be attached so that it can be removed if the mirror ever needs to be replaced.

If you ask me for the design, you'll have to look at my sketchy notes and look inside my brain. If I make a second one, I'm not sure it would come out the same.

BTW, the "R" was added as a surprise. I printed out a font from Word that both Bobbi and I agreed was ok and then carved it out of poplar. It turned out ok. The tray on the top is for loose items at night. And the inserts in one of the drawers are two types of ring holders: posts and grooves. I'm not sure which type was desired.
