At our July meeting, Gerald Dukes did a demo on turning Majito Muddlers. Pictures of the demo is shown later in this Newsletter. Thanks, Geerald. You did a great job.

First Presbyterian Church of Brunswick has reimbursed us for the paint for our project that the fellows accomplished during the winter and spring months. Thanks again to their efforts. It has made a tremendous improvement of the appearance of our new meeting place.

Paul Carter of Carter and Son Toolworks in Seattle, Washington, contacted us about introducing his company and their products. They have offered to provide us with some gift certificates for our raffles in the future. I provided them with all the information they requested and we should be seeing a gift package from them in the near future. You might want to visit their web site to familiarize yourself with their products. It is https://carterandsontoolworks.com/

One more month of true summer temperatures. Attendance was the lowest so far this year at nine. I'm hoping that increases as the busy summer months pass us by. Be aware of the weather forecasts. Severe storms can pop up at any time in this area. And, it's time to be alert to activity in the Atlantic. Stay safe.

We still need volunteers for demos, and/or suggestions for demos. Please think about doing one for us.

The club has 27 members to date. We are always looking for new members and encourage our current members to bring a friend whenever possible. One meeting might spark an interest they didn't know they had.

Remember, please send pictures of your projects before the 25th of each month to be certain to have them included in the Newsletter.
