FIRST PRESBYTERIAN CHURCH

1105 UNION STREET

BRUNSWICK, GA

PUBLIC WELCOME

DEMO:

KLINGSPOR ABRASIVES

PRESENTATION

PENDING CONFIRMATION

PRESIDENT'S MESSAGE

Spring is here—March Madness is in full swing, Major League Baseball season has started, and the Masters Golf Tournament is just around the corner. This is a good time to sharpen our tools, maintain our power equipment, and clean our shops before we tackle those new projects.

Our club Moravian workbench is just about finished and we may even get a peek of it at our April meeting! Thanks to Paul, Craig, Gerald, Ken H., and Steve D. for working on building and finishing the workbench.

We are awaiting confirmation from the Klingspor Rep for attendance and presentation by Klingspor and will have a video of Jack Thompson's demonstration on turning and safety that he has done at NE Fla WW Guild as well as other clubs. It is interesting and informative for all levels of woodturners.

We are looking for volunteers or recommendations for demos for the July and August meetings.

Your Board is continually looking for opportunities to show and sell our work. We will bring these opportunities to the membership once they are vetted as potential opportunities that make sense for our club. If you have any opportunities that have potential please let Ken, Herb, Karen, or me know.

The 2025 AAW Symposium will be in Minneapolis-St Paul in June and the 2025 AAW Segmented Woodturning Symposium is in September in Chicago. If you haven't attended one of these symposiums in the past I urge you to attend one. They are very informative and inspiring. I do have a word of caution though—your credit card bill may increase after you visit the vendors booths!!!!!

I'm looking forward to seeing everyone at our April meeting. Bring an item or two for Show and Tell. I'm impressed by the creativity and quality of everyone's work.

Steve

SECRETARY'S NOTE

The demo provided by Paul Speich at our March meeting was excellent. So sorry some of you missed it. I had occasion to use his techniques for sharpening chisels just a week after the demo. I was installing new hardware on my front door. The opening in the door for the latch assembly didn't quite line up with the new hardware. I sharpened my smallest chisel and VOILA!! Removing the excess wood was very easy with a sharp chisel.

There is always something new to learn at these demos.

Karen
